

Pro Star Pilatus Center delivers its first PC-12 NG

Pilatus is pleased to announce that its newest PC-12 Sales and Service Center, Pro Star Aviation of Londonderry, New Hampshire, has just completed its first customer delivery of a PC-12 NG. This is an important event for Pro Star as it continues to build on the outstanding success of the world's best-selling business turboprop.

Beginning in January 2009, Pro Star was awarded the exclusive PC-12 sales and service rights to the northeastern United States. Its territory includes Connecticut, Delaware, Maine, Massachusetts, Michigan, New Hampshire, New Jersey, New York, Rhode Island, and Vermont.

Henry Laughlin, CEO of Pro Star Pilatus Center commented, "We are delighted to deliver our first PC-12 NG to an important New Jersey based customer. We have no doubt the aircraft will perform all mission requirements flawlessly and we are excited to build upon this important company milestone."

Thomas Bosshard, President and CEO of Pilatus Business Aircraft, Ltd. added, "Pro Star Pilatus Center is a significant new addition to the worldwide PC-12 Sales and Service Network. Current and future PC-12 owners will certainly benefit from their customer-first attitude and their extensive turbine aircraft expertise. Congratulations on the first of what will soon be many great milestones for Pro Star."

With strategic locations throughout the northeast including Caldwell, New Jersey and Portland, Maine, Pro Star Pilatus Center is promoting and supporting PC-12 NG sales and service to build further brand awareness in the region.

The PC-12 NG, featuring a fully integrated Honeywell Primus Apex avionics suite, a completely new cockpit designed by BMW Group DesignworksUSA, and a more powerful Pratt & Whitney Canada PT6A engine, has set a new standard in business aviation. It offers the largest cabin in its class, strong performance, and low acquisition and direct operating costs, making it the ideal transportation solution for today's demanding economy.
